

Which school do you want for your child?

Your child will either start preschool class or change schools next year. You will therefore be able to request which school they should attend.

At goteborg.se/onskaskola you can see where the schools are located, read the rules and request the schools you want **between 15 January to 15 February**. The website also has information in several other languages.

You can either use the e-service or a form. If a child has two guardians, they both must agree to the application for it to be valid.

If you do not submit a request, your child will be placed in a school no more than two to six kilometers away from your home, depending on the grade your child will start. You will be notified of the placement at the end of March.

The following applies only if there are more people who request a placement in a certain school than there are places available.

- 1 Sibling priority.**
- 2 Relative proximity** – students with the longest travel distance to their alternative school gets the placement, not the one who lives closest to the school.
- 3 Absolute proximity** – if two students have an equal distance to their alternative school, the one living closest gets the placement.
- 4 Drawing of lots.**
