

This information is intended for guardians of preschool children.

In August we begin using Unikum

At the beginning of the autumn term all municipal preschools in the City of Gothenburg will begin using the Unikum digital tool. This means that Unikum will replace Hjärntorget, which many preschools currently use.

What is Unikum?

Unikum is a digital tool used in preschool, and focuses on learning, documentation and quality control. In Unikum you as a guardian stay up to date about your child's learning and development. Via Unikum you also receive important and current information about your child's preschool.

Why are we replacing Hjärntorget?

Unikum is more user-friendly for guardians and school staff and provides better means of communication, follow-up and participation.

Hjärntorget will close down on 30 June

On 30 June Hjärntorget will close down, and as a guardian you will no longer be able to log in. Hjärntorget may have information about your child, such as images or documentation. If you would like to save any of this for yourself, you have to do so before Hjärntorget closes down. [Read more here about how you save images and documentation from Hjärntorget.](#) Instructions are also available on goteborg.se/forskola under the tab *Förskola och familjedaghem/Hjärntorget*.

If your child's preschool isn't using Hjärntorget currently, there is no material there for you to save. Speak to the staff at your child's preschool if you are unsure.

Official documents

All documents that exist in Hjärntorget are official documents. Under the Archives Act all official documents must be saved by the administration.

Any documentation about your child that exists in Hjärntorget will be saved in a digital archive. Only you, as the guardian of your child, are entitled to access that information. The documentation will remain in the archive for ever, so that the children can access their personal information when they become older.

Do you have any questions?

You will be sent more information by your child's preschool during the spring and summer. If the preschool uses Hjärntorget, the information will be available there. More information is also available under *Aktuellt i förskolan* on goteborg.se/forskola.
